CONNECTIVITY & ACCESS

SIMPLE CONNECTION
MULTIPLE WAYS TO ACCESS

Consumable Solutions Vending Machines come with a choice of network interfaces. Depending on the network infrastructure of your facility, a vending machine can be connected to a central server via Ethernet, Wi-Fi or GSM modem.

Subject to the vending machine model, authorised personnel gain access to your consumables in a number of simple ways:

RFID

Barcode

Keypad

QR Code

Magnetic Reader

AVAILABILITY & CONTROL

CONSTANT AVAILABILITY
OF NECESSARY PRODUCTS

The combination of our automated warehouses and our integrated distribution system (IDS) enables our clients to control the goods-to-person distribution process 24 hours a day and provides constant availability of necessary products.

- 24/7 availability - products can be picked up irrespective of warehouse working hours
- Stocks under control - reduction in stock and thorough product flow monitoring
- Drop in the consumption of products by up to 50% - through full control over the distribution process and the option to set up individual limits for each employee
- Immediate generation of reports - the option to create cross-reference lists useful for purchasing, work safety, controlling and accounting departments
- Simplification of supplies - constant access to current stock level
- Saving time - minimizing time necessary for the collection of products by employees
- No error - access to each product is assigned to individual employees based on department

VENDING MACHINE D810

RECORD CAPACITY
AT THE SMALLEST DIMENSIONS

The D810 automated machine is a self-service machine capable of automatically distributing up to 810 different products. Its construction is based on a rotary drum and enables clients to store a large volume of goods within a small area. Intuitive management is provided through a touch screen. Through the patented compartment scanning system, loading of the compartments is fast and easy. You can connect a bar code reader and L40S,D540S and D1080S automated device to the D810 machine.

TECHNICAL SPECIFICATIONS						
Height [mm]	1915	Width [mm]	805	Depth [mm]	790	
DIMENSIONS IN MM		NUMBER OF COMPARTMENTS	A	B	C	D
		810	80	50	275	10
		540	80	75	275	15
		270	80	150	275	30
		405	170	50	275	10
		270	170	75	275	15
		135	170	150	275	30
		270	270	50	275	10
		180	270	75	275	15
		90	270	150	275	30

VENDING MACHINE D1080

AUTOMATED MACHINE
WITH RECORD CAPACITY

The D1080 automated machine is a self-service machine capable of automatically distributing up to 1080 different products. Its construction is based on a rotary drum and enables clients to store a large volume of goods within a small area. Intuitive management is provided through a display with 15 touch sensitive buttons. Through the patented compartment scanning system, loading of the compartments is fast and easy. You can connect a bar code reader and L40 and D540 automated device to the D1080 machine.

TECHNICAL SPECIFICATIONS											
Height [mm]		1915		Width [mm]		1110		Depth [mm]		1092	
DIMENSIONS IN MM			NUMBER OF COMPARTMENTS		A	B	C	D			
			1080		80	53	437	7			
			720		80	80	437	11			
			360		80	160	437	23			
			540		160	53	437	7			
			360		160	80	437	11

VENDING MACHINE L40

MULTIFUNCTION AUTOMATED MACHINE
FOR DISTRIBUTION OF LARGE-SIZE PRODUCTS

The self-service L40 machine is designed for automatic distribution of up to 40 different products. A simple, square construction enables you to load large-sized products. Specially designed openings in the back of the shelves allow for internal 230V installations to supply power to the stored products. Intuitive management is provided through a display with 15 touch sensitive buttons. You can connect a bar code reader to the machine.

IDS - APPLICATION

INTEGRATED DISTRIBUTION
SYSTEM FOR ALL INDUSTRIES

We supply our machines together with IDS (Integrated Distribution System) software. The application enables easy data administration and fast communication between the server and our vending machines.

IDS displays information on particular items taken and current stock level on any device with a web browser. The application is adjusted to the specificity and the needs of any company operating in any industry.

Combination of software and vending machine assures maximum control over the consumption of products in production companies. As a result, the quality and efficiency of work in purchasing, work safety, warehousing and controlling departments, as well as the work of all of the employees at your company, increases exponentially.

IDS APPLICATION ENABLES CLIENTS TO:

Manage particular products, product categories, companies and distributors, employees, RFID cards, system users and machines

Define, generate and print all types of reports

Constantly inspect stock levels

Provide information about content of a machine automatically to an authorized person
